

Specialist Consultancy and Training

Supporting the UK pest prevention servicing,
food manufacturing and food retail industries

Harvard 
pest consultancy &
training services

Harvard Pest Consultancy and Training Services Ltd was formed by staff with over 25 years experience in the pest prevention industry.

This specialist consultancy provides support to all pest control/prevention companies large, medium and small, including local authorities and also food manufacturers using their own in-house staff.

Pest prevention industry services

Commercial support

Harvard will assess your current business image and show how to promote the company, advising on the strengths and weaknesses of the business and giving advice with a business strategy.

We will illustrate how to develop your company and gain a larger market share in any sector, as well as major or national accounts. Harvard will advise on advertising, media selection and direction in order to win tenders.

Technical data

Codes of practice

Harvard writes codes of practice and will assess those in current use, updating with the changes in legislation as necessary. We also take into account industry trends, the client's requirements and best practice.

Technical literature

A wealth of knowledge, literature and material is available from Harvard designed according to the requirements of clients in the form of books, brochures, leaflets, flyers, booklets, data sheets and cards. Our in-house designers produce all artwork and cost effective printing is carried out by a specialist printer.

We source old, new and out of print books / papers etc. for customers on any subject in natural history and pest prevention.

Technical inspections

Quality assurance and technical inspections

Harvard carry out quality assurance audits, technical and biological assessments, a problem-solving service and are prepared and are prepared to act as expert witnesses in court cases.

Product development

We are specialists in product development and have innovative ideas carrying out field trials in retail and manufacturing premises in partnership with clients. Creative thinking solutions are applied to problem solving.

Training

Flexible modular courses according to our clients' individual requirements including:

Technical training

- Rodents
- Insects
- Stored product insects
- Flying insect pests
- Birds
- Basic pest awareness for administration staff / new recruits
- Refresher training
- Safe use of pesticides
- Advanced training to BPCA and NVQ level
